

## Rubbish & Recycling Proposal

The Kerikeri Cruising Club currently provides both rubbish & recycling services for the purpose of disposal of boating waste. The facility has open unsecured access & there is evidence that it is being abused by people who are not club members & even some club members dumping domestic waste & taking advantage of the services paid for by marina licensees & the Club.

The Club would like your input before undertaking further work on the rubbish & recycling services. There will be an opportunity for discussion at both the Marina Berth Licence Holders AGM & the Club AGM. You are also invited to give written input. The deadline for written input is Wednesday 3 October 2018.

After the AGMs, a decision will be made about whether to pursue changing the rubbish services & Club members will be kept advised.

Three options are being considered. These are:

1. Status Quo - year-round rubbish & recycling service with unsecured access
2. Limited Seasonal Service - December-February rubbish & recycling service with unsecured access. Pre-paid rubbish bags available for purchase from the office outside the peak season or take waste home.
3. No Rubbish or Recycling Facilities - boating waste to be removed from site by boat owners & marina users. Pre-paid rubbish bags available for purchase from the office or take waste home.

### Options Summary

Option	Cost	Advantages	Disadvantages
Status Quo	\$6,732 exc GST or \$35 exc GST per berth	Easy access Year-round service	Opportunity to be abused Relatively high cost compared to reduced service options
Limited Seasonal Service	\$3,194 exc GST or \$17 exc GST per berth	Easy access Service during peak season	Limited services for majority of the year Additional administration of selling rubbish bags. Additional labour to shift rubbish bags on collection day.
No Rubbish or Recycling Facilities	\$750 exc GST or \$4 exc GST per berth	Low costs	No facilities for licensees or marina users.

			Additional administration of selling rubbish bags. Additional labour to shift rubbish bags on collection day.
--	--	--	--

In addition to the boating & marina waste the clubhouse generates some rubbish & recycling. This cost will continue as clubhouse waste disposal is necessary.
